08. Home of Innovation	18

Dear reader,

Siemens inventions have revolutionised the life of mankind for more than 165 years. Siemens inventions such as the electric railway, the pacemaker and the MRI scanner were ground-breaking revolutions for humanity. In the 1920s, innovations in Siemens Home Appliances such as the first electric cookers and washing machines improved the quality of life and saved our consumers precious time and effort. Later we made the achievements of the digital revolution usable in private homes and the life of our consumers more convenient and flexible.

Today's generation of Siemens Home Appliances is intelligent and connected thanks to innovations like hyperFresh and activeClean®. Our innovations interlink life and technology in a perfect match and pave the way into the future. Ever since the early days, our innovations have come packaged in iconic Siemens design. This is recognised by straight-lined symmetries and well-balanced structures, and by user interfaces which are designed to facilitate intuitive ease. Our foresight enables us to keep inventing the future to improve the quality of life in people's homes.

Siemens. The future moving in.

The Perfect Siemens Kitchen.

Create a kitchen that combines both symmetry and innovation with our full range of refrigeration, cooking and dishwashing appliances.

Refrigeration.

Dynamic features such as hyperFresh and noFrost help you get the most out of your food.

iQ100 KI86NNSFO
